Symposium Functional Neurological Disorders (FND)

Wednesday, March 20th 2024
CHUV, Lausanne

Functional neurological disorders (FND) include a very diverse set of clinical conditions that often raised significant diagnostic and therapeutic challenges.

Important progress has been achieved to better understand, recognize and manage these disorders.

This interdisciplinary symposium aims at reviewing and disseminating the state-of-the-art knowledge in the field, addressing all major types of FND, their neurobiological and psychosocial pathophysiology, clinical characteristics and treatment approaches.

We are extremely grateful to our outstanding panel of speakers, all of whom are worldwide experts in FND, for having accepted our invitation.

We look forward to their lectures and seeing you in Lausanne on that occasion

Best regards,

The organizing committee

*Philippe Ryvlin, Selma Aybek,
Alexandre Berney & Arseny Sokolov*

INSCRIPTION OBLIGATOIRE

Délai: 01.03.2024

13:30

Welcome

Philippe Ryvlin

Department of Clinical Neurosciences,
Lausanne University Hospital, Switzerland

13:50

Functional Seizures

Barbara Dworetzky

Harvard medical school, Division of
Epilepsy, Brigham and Women's Hospital,
Neurosciences Center, Boston, USA

14:15

**Functional
Movement Disorders**

Mark Edwards

Institute of Psychiatry,
Psychology and Neuroscience
King's College London, UK

14:40

**Functional Cognitive
Symptoms and Persistent
Perceptual Postural
Dizziness (PPPD)**

Jon Stone

Centre for Clinical Brain Sciences,
University of Edinburgh, Edinburgh, UK

15:05

Coffee Break

15:30

Pathophysiology of FND

Selma Aybek

Faculté des Sciences et de Médecine,
Université de Fribourg, Switzerland

15:55

Psychiatry of FND

Alan Carson

University of Edinburgh, UK

16:20

**Findings from
the Italian FMD Registry**

Michele Tinazzi

University of Verona, Italy

16:45

Roundtable

All

17:15

Closing remarks

Arseny Sokolov

Department of Clinical Neurosciences,
Lausanne University Hospital, Switzerland

17:20
